

CIZARO

CIZARO

¿What is CIZARO?

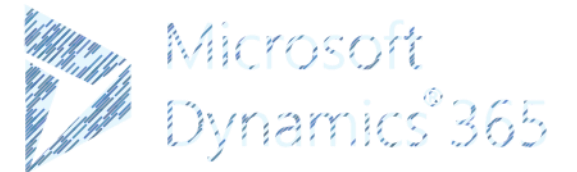

CIZARO is a hybrid ERP and POS SaaS system with full E-Commerce and multi-channel integration.

Totally revolutionary worldwide built to adapt to any business size, process, industry or geographic location.

These powerful capabilities are facilitated by our unique architecture that enables on-the-fly (OTF) development and customization while reducing operational costs for our partners and end customers and meeting specific market demands.

CIZARO

Main Solutions

❖ INCOMPLETE SYSTEMS

- ❖ Double entry or recording problems in different business processes.
- ❖ Fragmented data collection.

❖ NON-SCALABLE

- ❖ Pre-established work structure.
- ❖ Limited capacity for growth and requirements.

❖ ONE SIZE FITS ALL

- ❖ Inflexible, only one user interface, predetermined business scope.
- ❖ Lack of BI, features, modules.
- ❖ Limited industry and niche applications.

❖ OUTDATED - OUT OF SYNC

- ❖ Limited connectivity between business processes, also weak BI integration.
- ❖ Works only in local or browser, - never in both hybrid, depends on internet connectivity.

❖ EXPENSIVE - COSTLY

- ❖ Waste of time and cost overruns.
- ❖ Development, customization and implementation are limited, expensive and complicated.

❖ CONSERVATIVE

- ❖ No innovation - Follow the rules, no creativity.
- ❖ No evolution in management capabilities.

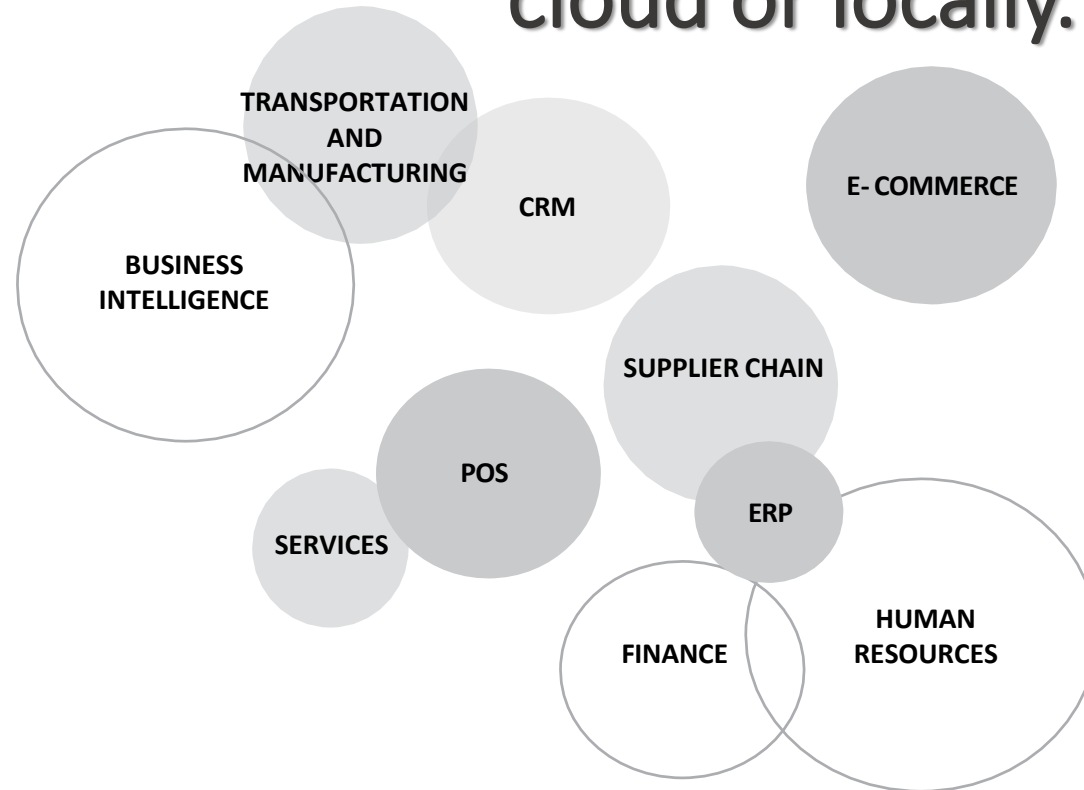

❖ LIMITED PARTNERSHIP

- ❖ Limited opportunities and revenue in the Allied sector.
- ❖ Limited community building, customers.

❖ RIGID / OPEN SOURCE

- ❖ Rigid applications, cannot be changed or cost too much to develop modularly.
- ❖ Additional modules are sold separately.
- ❖ Open source requires a development team with advanced technical knowledge.
- ❖ Development infrastructure, deployment, testing, QA and production environments are required.

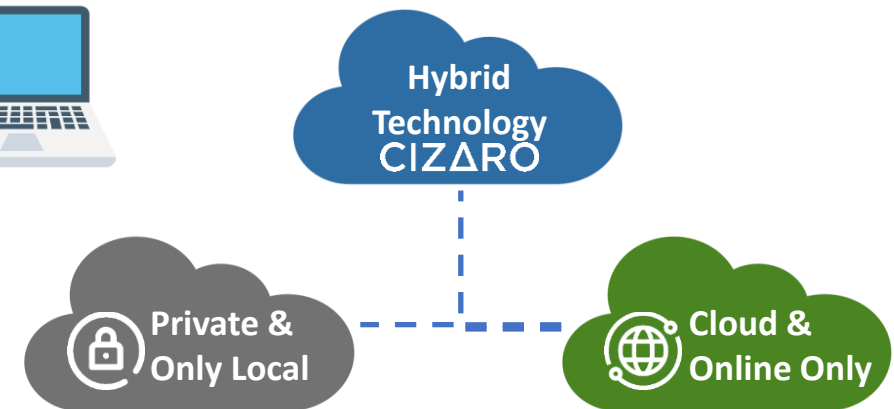

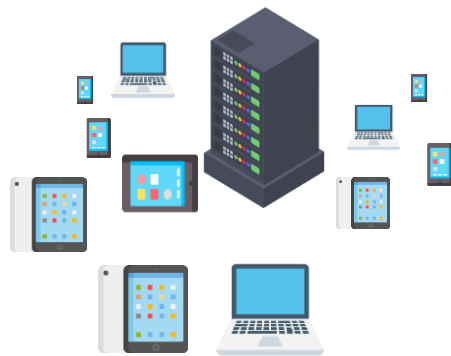

Current solutions on the market are applications that are fragmented and sold separately, are rigid, and work only in the cloud or locally.

Real Hybrid Synchronization

CIZARO

Information is available and secure, centralized and distributed in any database on any network.

On-Premise

Rental

CIZARO

Hardware

CIZARO is a reliable revenue channel for software projects, which often generate hardware needs, so the partners have the ability to manage and supply equipment solutions for these projects.

Some examples:

*POS Printers,
Tags or Labels*

*Terminal
Equipment*

*Barcode
Readers*

CIZARO

Licensing Server

CIZARO offers a self-managed and replicated license server for partners with full control of the entire SaaS and On-Premise delivery process, generating confidence because through this server you can activate and deactivate features, manage time, renew licenses, manage hardware, revoke authorizations and more.
