Flexible solution

Flexibility is one of the Cizaro's mainstays, allowing the software to successfully adapt to the size and needs of each particular business through a highly customizable system that breaks the paradigm "what you see is what you get". With Cizaro, you decide what elements of the system your company needs and how you want to customize them

- Designing personalized screen
- Adding exclusive fields
- Optimizing the User Interface
- Producing special reports, dashboards, etc

Cloud

All branches supervision

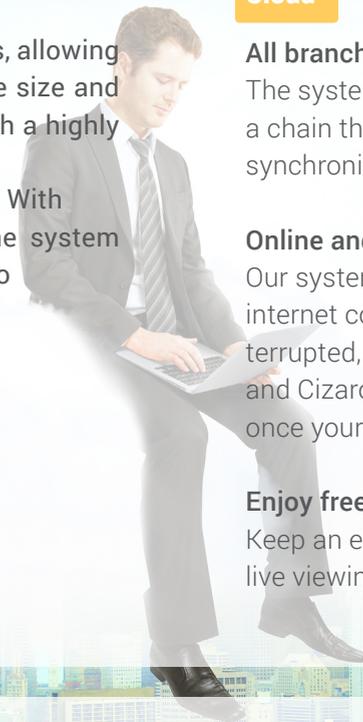

The system is suitable for one location as well as a chain that requires an automatic and real-time synchronization between all departments.

Online and offline functionality

Our system is fully operational regardless of your internet connection. If your Internet access gets interrupted, you can still working on your transactions and Cizaro will automatically update the system once your connection is back.

Enjoy freedom everywhere

Keep an eye on your business performance with our live viewing panel for sales and other activities.

HYBRID SOFTWARE AS A SERVICE

Harnessing the latest inventions of Hybrid SaaS technology, we provide a state-of-the-art model that integrates Cloud computing with Local databases to gain advantages of the two. You are free to decide whether you prefer to access data online, from your chosen server or both – whichever you choose, the system will perform quickly and steadily to meet your highest quality requirements.

- **Protect privacy**
- **Set up domestic networks**
- **Connect to cloud or local/external database**

In-Depth Reports

Cizaro swiftly processes the dense network of data into clear charts so you gain an excellent understanding of the business. Filter and select information to produce intelligent info sheets with everything you currently require.

- **Schedule periodic reports to email**
- **Customize your own types of sheets**
- **Add your own fields of analytics**

Real-Time Dashboards

Eye-catching display of live dataflow can become a truthful friend for those managers seeking to increase productivity and watch progress dynamics of their business. Our engaging design incorporates:

- **Gauges**
- **Charts**
- **Diagrams**
- **Sparklines**
- **Grids**
- **Graphs**
- **Bars**

Roles & Access Permissions

Grant access to different parts of the system for an individual or a group of employees.

Sophisticated Log Book

Trace back every operation that happens in the system and identify its specific characteristics.

Smooth Data Transfer

Cizaro effortlessly interconnects all complex modules for a fast and reliable user experience.

Smart Search Tool

Find every particular item in your stock by entering any associated piece of information.

Reminder Coordination

Don't miss any important event or schedule periodic alerts for your workers.

Warranty Service Point

Specially designed set of features can help you deal with warranties and service requests.

Customer Secondary Screen

Upgrade your points of sale with a secondary screen to display information to customers.

Customer Information Point

Equipped with screens and barcode scanners, these points can quickly deliver product info.

International businesses can smoothly cross geographical borders to achieve easy management and supervision on global level. Cizaro converts currencies and measurement units to present unified reports from different countries, which allows general comparison of worldwide locations.

Available in English, Spanish and Hebrew. You can request any extra language and we will start translating right away. Extra languages can be added on request.

Currency and Measure Units are interconvertible

Make Cizaro the driving force behind your employees success! Your staff can work harder and more efficient with proper incentives. This POS solution boasts intelligent systems structured to spur your business turnover by lifting the team spirit.

We coordinated all the most efficient communication channels for the benefit of all parties involved.

- Real-time rankings
- Periodic summaries
- Whatsapp & email messages
- Commision structure
- Reward system
- Goals and Targets
